

# Are You Programmed for Success or Failure?

## Key Points:

**Our Subconscious Stores Everything We Experience** - every impulse of thought received by our senses is classified and stored in our subconscious mind.

**Our Subconscious Can be Programmed** - We can voluntarily plant into our subconscious mind any plan, thought or purpose which we wish to translate into physical reality. We can literally give it instructions and plans for accomplishment and our subconscious can bring into concrete form the very things we desire.

**How We Influence It** - Our subconscious always acts on our dominating thoughts, desires and emotions. We create what we want (and don't want) by repeatedly thinking the same thoughts and feeling the same emotions.

**Self-Programming Happens All the Time** - We literally program ourselves for success or failure depending on the dominating thoughts and emotions we choose. The subconscious mind works day and night towards the realisation of the "commands" which we give it.

**Connected to the Entire Universe** - Prayer is simply repeated thoughts with emotion. Our subconscious is the medium through which our prayers are transmitted out into the universe.

The subconscious mind draws upon the forces of universal consciousness to transmute ones desires into their physical equivalent. It does this by making use of the most practical media by which end this may be accomplished.

**How to Program Our Subconscious for Success** – Affirmations and Self-Hypnosis if done regularly are excellent methods to program our subconscious mind for achieving anything we desire.

### **Summary:**

In order to ensure that we draw into our lives our deepest desires and prevent our fears from becoming reality we must learn how to program our subconscious for success.

Although we may believe ourselves to be worthy of achieving success; if we subconsciously believe ourselves to be unworthy or if we subconsciously believe that we cannot achieve success then we cannot achieve true success.

In such cases, success can only be achieved by reprogramming our distorted and limiting self beliefs.
